NC State’s influence extends well beyond North Carolina’s borders. Faculty and students in the College of Engineering are working with some of the world’s brightest minds and studying in some of the coolest places. These programs and partnerships are just a small sampling of NC State’s global reach.

**Worldwide Connections**

The Golden LEAF Biomanufacturing Training and Education Center’s (BTEC) many international collaborations include formal agreements with the University of Strasbourg in France and five universities in China aimed at furthering bioprocessing and biomanufacturing education.

NC State’s International Association for the Exchange of Students for Technical Experience (IAESTE) coordinates on-the-job training for students in engineering, computer science and other technical fields. Recent students have held internships in Italy, Switzerland and Denmark.

**Study Abroad**

Students looking for a study-abroad experience have plenty of options at NC State. Locations listed below include some of the more popular programs for engineering students.

- Australia
- Botswana
- Brazil
- China
- Ghana
- Japan
- Mexico
- Malaysia
- South Africa
- Spain
- Sweden
- Wales
- Switzerland
- Germany
- Austria
