EDAP Background

There is a continuing need to develop highly qualified engineers to perform many specialized functions within FRC East. EDAP is a work-study program that provides for the Command’s future personnel resource requirements through the systematic development of highly motivated employees. Selectees will be placed in engineering technician (student training) positions in which they will receive work assignments and the experience of a professional nature while pursuing a four year degree in an engineering curriculum at a local college or university.

Tuition assistance may be available to engineering technicians who are selected into EDAP.

Qualifications

To be eligible to compete for EDAP, candidates must be enrolled in a four year professional engineering curriculum and demonstrate the ability to succeed as evidenced by completion of at least:

- One semester / term of calculus, chemistry, physics, and Introduction to Engineering courses that are applicable to the main degree program, with grades of “C” or better.

Participants will fill special engineering technician positions in the Engineering Department at FRC East, Cherry Point.

Positions consist of the following:

- Aerospace Engineering Technician
- Materials Engineering Technician
- Mechanical Engineering Technician
- Electrical Engineering Technician
- Electronics Technician
- Industrial Engineering Technician
- Physical Science Technician
- Environmental Protection Specialist
HOW TO APPLY TO EDAP!

Candidates may apply for one or more than one position when EDAP vacancies are announced.

Applicants will be ranked according to job elements specific to the job being filled. To be placed in the “highly qualified” category, applicants must present evidence that predicts their academic success in a four year professional engineering curriculum.

Once the EDAP announcement has been disseminated, applicants will be required to submit the following:

- Resume
- Transcripts of all college level education
