

# NE North Carolina Mobile CARE Partnership

*Driving Clean Air and Renewable Energy throughout North Carolina*

*You're invited!*

Plan to join local government and business fleet managers, fuel and technology providers, environmental groups, non-profit organizations, and concerned individuals for a kick-off quarterly working group meeting to address mobile emission reduction efforts through the use of alternative fuel and advanced transportation technologies in the Triad. In order to support regional economic development opportunities, diversify fuel supplies and create a healthier environment, transportation solutions must be addressed at a local and regional level. Organized by the NC Solar Center at NC State University and hosted by Upper Coastal Plain Council of Government (UCP COG), this partnership will provide a forum to share ideas, develop a plan, network, and investigate issues and opportunities for the Edgecombe, Nash, Halifax, Northampton, Wilson, and Pitt Counties to expand clean transportation technologies. Join us for an upcoming meeting....
